## **PROFESSIONAL SUMMARY**

Junior Full-Stack Developer with hands-on experience building React and Node.js applications. Strong foundation in JavaScript, TypeScript, HTML, CSS, Express, and modern tooling like Tailwind. Former U.S. Military Systems Administrator with practical experience managing Windows/Linux environments and supporting complex networks. Brings a disciplined, detail oriented approach to problem solving and a steady track record of self driven learning. Excited to keep leveling up and contribute to a team that values clean, innovative, and maintainable code.

## **SKILLS**

Adaptable	Collaborator	Quick Learner
Problem Solver	Intuitive	Meticulous
Insightful	Innovative	Well spoken

## **WORK HISTORY**

### **United States Marine Corps - Camp Pendleton, California**

#### **Data Systems Administrator**

**Jun. 2020 - Jun. 2024**

Served as a System Administrator for a Marine Battalion consisting of over 1000 end users. Email support, SharePoint, Windows OS (v11) with 365, VoIP. Reported directly to the CTO of the organization. Applications included ServiceNow and Remedy. Adaptive person with an apt for tech.

- Modified databases to meet needs and prerequisites determined during the planning process while following the core security tenets of the unit's cybersecurity guidelines to image data systems from bootable flashes or burned disks for over 170 systems.
- Strategized with personnel to identify and resolve over 300 cybersecurity anomalies such as updating computer group security policies and isolating user accounts to prevent security incidents.
- Conferred with project personnel to identify and resolve problems by implementing initiative-taking maintenance schedules, thus ensuring maximum levels of the availability aspect of the CIA Triad while minimizing unexpected issues.
- Monitored performance of project members, providing and documenting performance feedback for over 25 enterprise level projects.

## **AllegiantVets OJT Skillbridge - Rocklin, California**

### **Software Developer**

**Jun. 2024 - Present**

Handpicked among a large pool of other transitioning military applicants with software experience to participate in an OJT Skillbridge opportunity. Sourced various libraries to build projects for clients. Scripted in JavaScript using VS-Code. Troubleshoot issues within the GitHub branches and merged projects. Primary focus was front-end development with a bit of SQL (MongoDB).

- Used UX/UI user-centered design principles, conducted research to determine, recommend, and plan the creation or modification of apps or websites.
- Facilitated group projects on HTML, CSS, JavaScript and program coding.
- Debugged code by correcting erroneous entries and checking the program to ensure the desired result was produced using REACT testing library i.e. Unit, Integration, and E2E(Cypress) testing.
- Using Git/GitHub successfully executed revision, repair, and expansions of existing components to increase operating efficiency or adapt to new requirements.
- Compiled and wrote documentation of program development and subsequent revisions, inserting comments in the coded instructions so project colleagues could understand the purpose of new program entries.
- Successfully brainstormed with project personnel in the basic outline stage to propose ideas for the form, structure, and appearance of the web page or application.
- Conducted trial runs of programs to ensure it produced the desired information, the code was without error, and the page responded in an expected manner.

## **Self-Taught Coding Projects**

### **Program Project Building**

**Jun. 2018 - Present**

Coding using HTML, CSS, JavaScript, and TypeScript languages. Utilized React libraries and framework tools with the VS-Code IDE. Designed, maintained, and manipulated 12+ websites and web-applications for teachers, family, and personal use, and recently hand-picked among other veterans to participate in a cohort of 25 on-the-job interns as a Junior Full-Stack Developer.
